My Profile

I like to tell a good story, and as a first impression, a good website should feel and tell like one. Arts and creativity have been two things I firmly believe are necessary to everybody, but for me, as a systems/computer enthusiast, I would say that having worked in multicultural, diverse environments, and with people from different ranks, creativity is a valuable resource versus strong analytical problem-solving. There is not one without the other.

Learn continuously and help a community grow with knowledge power, are my stimuli, and that I would describe best with a motto: **"Working better"**. Let me share you my experience, my passion for detail, and let's work together.

<This is/> My Work Experience

May 2010 - December 2019
IT Systems Consultant
Various companies

July 2020 - To date
Independent Front-End Developer
Freelancer

Experienced IT Systems Consultant, having worked with diverse technologies, like cloud (SAP Fiori, SuccessFactors) ERP (SAP NW) and Java, UNIX-based systems. My main experience ranges from coaching a small team to apply effective security design strategy, to daily support and consulting for diverse projects for ~9 years.

Independent developer, impulsed by a can-do attitude, care for detail, and self-taught during leisure time.

Having worked in some brief local scholar projects, you will find this work in my webpage for more details.
